Passport | Parking

Passport Parking

The easiest way to pay for parking.

The Passport Parking app is the most convenient and smart way to pay for parking. Built for cities and private operators, it helps manage barrier-less parking inventory with components to scale parking operations.

Our application allows you the flexibility to create customer wallets, and unlike other mobile parking apps, Passport does not settle a parking transaction until the time has expired or the user has ended their session.

Core Benefits

Contactless Payments

- iOS, Android and mobile web apps
- Closed-loop wallet with discount capabilities
- A self-service merchant portal for local businesses to offer validations

Simplified Service

- User-friendly
- Find Parking Map allows parkers to easily locate parking and initiate payment from their selection
- Reminder notifications, email receipts and remote session extensions

Improved Staff and Customer Experiences

- Direct integrations with leading providers of parking enforcement and LPR software
- Save money on processing fees by up to 50%
- End-user support tools and FAQs
